

INDUPHONE WP SERIES

WEATHER-PROOF IP66/67 PHONE

HANDSET / KEYPAD

To be safe to be on time.

DESCRIPTION

The A2S 'INDUPHONE WP' series is made for environments that need a telephone which can withstand rough usage and treatment features.

The telephone is well suited for heavy duty usage due to the thick aluminum material body (Housed in robust aluminum die case with spring loaded door as demand), and very high ingress protection (IP-67). The station provides high quality conversations, using HD Voice and A2S 's superb audio technology such as active noise filtering, echo cancellation, wide band audio codec and high power audio outputs.

The telephone with two available type : Standard Analogue and SMART VoIP-SIP protocol.

FEATURES

- Four variants: Full keyboard and hotline (no keyboard), both with or without door
- Made for critical communication in rough environments like roads, tunnels, ships
- Extremely water and dust resistant (IP67)
- Very durable with 5 mm aluminum casing and stainless steel components
- Magnetic reed hook-switch ensures minimal wear and tear
- Hearing Aid compatible receiver, Noise canceling microphone
- Last number redial
- Adjustable ringer and volume control
- Option for GSM cellular connectivity
- Support local power and Power over Ethernet (PoE)
